Nexans

Voice Patch Panels
Voice Patch Panel 50 RJ45 2 pair White
Nexans ref.: N500.350

- 50 RJ45 ports on 1U
- 2 pairs per port
- LSA/110 punchdown
- white
- also available in black

Description

Application

Nexans voice panels are designed to integrate voice circuits in standard structured cabling systems.

Design

The patch panel is designed for standard 19" rack mounting and is equipped with 50 RJ45 ports on 1U to meet high density requirements.

Each port is individually numbered.

The panel incorporates a cable management tray for the strain relief of terminated cables.

Also available in black: N500.350BK

Installation

- 2 pairs per port (pins 5,4 - 3,6)
- LSA/110 punchdown
- Accepts multi-pair cables from 22 to 26 AWG
- Supplied with:
  - Cable fasteners
  - Earthing strap
  - Set of 4 bolts and cage nuts

Standards

International ISO/IEC 11801
